

NANDISHWAR E N

Cybersecurity Engineer | Security Analyst | SOC Analyst

Bengaluru | +91 8050945774 | nandhu567n@gmail.com | [LinkedIn](#)

OBJECTIVE

Motivated Engineering student specializing in Cybersecurity, IoT Security, Blockchain, and Data Analytics, with a strong foundation in network security, ethical hacking, vulnerability assessment, threat analysis, and data-driven problem solving. Proficient in Burp Suite, Nmap, SQLMap, Nikto, Linux, Python, SQL, and security automation. Experienced in developing real-world projects involving Wi-Fi threat detection, real-time packet analysis, IoT honeypot systems, and analytical solutions. Demonstrated leadership as Vice President of 170+ students, Cybersecurity Club Coordinator, and Event Head for a national-level CTF hackathon with 180+ participants from 20+ colleges. While my core expertise lies in Cybersecurity and Data Analytics, I am open to opportunities across diverse technology domains where I can learn, contribute, and grow. Seeking internship or entry-level roles in Cybersecurity, Security Operations (SOC), Information Security, Data Analytics, or other technology-driven positions.

EDUCATION

B.E. — Computer Science (IoT, Cybersecurity & Blockchain)	2027
Alvas Institute of Engineering and Technology, Mangaluru	CGPA: 8.3 / 10.0
Pre-University (PCMB) — Swaragrani PU College, Bengaluru	2023
Karnataka State Board	Score: 70%
Swaragrani School, Bengaluru — ICSE Board	2021
Secondary School Certificate (Class X)	Score: 87.33%

TECHNICAL SKILLS

Cybersecurity: Network Security • Threat Analysis • Vulnerability Assessment • Risk Management • EDR	Networking: TCP/IP • DNS & DHCP • Routing & Switching • Packet Analysis • SSH & Telnet
Security Tools: Burp Suite • Nmap • SQLMap • Nikto • Wireshark • Cowrie Honeypot	Programming: Python • C • Java • SQL
Data Analytics: Excel • SQL • Pandas • NumPy • Matplotlib	OS & Platforms: Linux (Kali, Ubuntu) • Windows • ESP32 • Git & GitHub
Soft Skills: Critical Thinking • Problem Solving • Leadership • Public Speaking • Team Collaboration	

CERTIFICATIONS

Computer Networks and Network Security	IBM 2025
Google Cybersecurity Professional Certificate	Google 2026
Ethical Hacking Essentials	IBM 2026
Google Data Analytics Certificate	Google 2026
2025 Data Structures Using Python	Udemy 2025

PROJECTS

ThreatLens — Intelligent IoT Honeypot & Threat Intelligence System [In Progress]

Tech Stack: Python, Flask, ESP32, Cowrie Honeypot, SQLite/MySQL, Wireshark, TCP/IP, SSH, Telnet, HTML/CSS, JavaScript

- Designing and deploying an IoT honeypot environment using ESP32 and Cowrie to simulate vulnerable devices and capture real-world cyberattack data.
- Developing real-time attack logging and threat intelligence modules to analyze attacker behavior, login attempts, and network intrusion patterns.
- Building a Flask dashboard for live visualization of attack trends, analytics, and IoT security insights — currently implementing attack simulation recording.

SafeNet — Public Wi-Fi Threat Detection & Security Analysis Platform [2025]

Tech Stack: C#, ASP.NET, .NET Scanner, Bootstrap, MySQL, Git, Visual Studio

- Built a public Wi-Fi security monitoring platform using ASP.NET and a custom .NET scanner to detect rogue access points and analyze network exposure.
- Implemented a rule-based threat intelligence engine to classify attack types including MITM, DoS, and Wi-Fi malware distribution from live network data.
- Developed an interactive dashboard for real-time threat visualization and automated risk scoring to guide user security decisions on public networks.

Network Analyzer — Real-Time Packet Monitoring & Traffic Analysis Tool [2025]

Tech Stack: Python, Scapy, Socket Programming, Psutil, Flask, Wireshark, Git

- Developed a real-time packet capture tool using Python and Scapy to monitor live network traffic and extract source/destination IPs.
- Implemented deep packet inspection to classify TCP, UDP, and ICMP protocols and generate traffic statistics for performance monitoring.
- Built a Flask dashboard to visualize network usage patterns supporting security troubleshooting and analysis.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Vice President — CS Dept. (IoT, Cybersecurity & Blockchain)

2024 – Present

- Elected to lead a cohort of 170+ students, overseeing branch forum activities and serving as the primary liaison between students and faculty.

Cybersecurity Club Coordinator

2024 – 2025

- Coordinated club operations for nearly a year, driving student engagement in cybersecurity awareness, skill-building sessions, and practical security demonstrations.
- Conducted 5+ cybersecurity awareness sessions across MBA students, Engineering freshers, and BCA students — covering real-world threats in everyday platforms like Instagram and Facebook including phishing, account hijacking, and privacy risks.
- Delivered an awareness session to Rotary Club members of Mudabidre including lawyers, institutional chairpersons, financial officers, and senior officials — presenting cybersecurity risks relevant to professional and organizational environments.

Reader's Club Coordinator

2024

- Coordinated the Reader's Club at Alvas Institute, organizing panel discussions with prominent guests including author Avalok Langer and The Hindu Vice President Shridhar Arnala.
- Facilitated interactive sessions delivering meaningful perspectives to students on literacy, critical thinking, and personal development.

National-Level CTF Event Head

2024

- Spearheaded end-to-end execution of a 24-hour national-level Capture The Flag competition attracting 180+ participants from 20+ colleges, managing cross-functional teams across sponsorship, design, and finance.

ACHIEVEMENTS

- **Delivered cybersecurity awareness to 200+ individuals** — across academic institutions and professional communities including Rotary Club members, MBA students, and Engineering freshers in a single academic year.
- **Successfully hosted a 24-hour National-Level CTF** — with 180+ participants from 20+ colleges as Event Head — managing the full event lifecycle from planning to execution.
- **Elected Vice President** — of the CS (IoT, Cybersecurity & Blockchain) department, representing and leading 170+ students across academic and extracurricular initiatives.
